

ATLAS RAIL PS-2600 PORTAL LATHE

The Atlas Rail PS-2600 portal wheel lathe has been designed for re-turning operations for a wide variety of wheelset types and gauges. Designed in consultation with Australia's largest wheelset maintainers.

The PS-2600 Next generation Portal Lathe provides:

- Increased cutting capacity
- Increased throughput
- Improved swarf removal capability
- Safer operator environment
- Safer maintenance environment
- Reduced civil infrastructure costs
- Designed for ease of maintenance and commonality of parts
- Proven in Heavy haul applications
- Globally cost competitive
- Dual gauge configuration capability
- Autonomous operation configurable

Marand customers include:

Rio Tinto

Backed by the largest in-country Rail Workshop service and support capability; service and support capability that only an original equipment manufacturer can provide.
