ATLAS RAIL 180T CAPACITY LOCOMOTIVE TURNTABLE

The Atlas Rail Locomotive Turntable is designed for 180 degree rotation of rolling stock up to 180T capacity. The turntable allows fast and efficient rotation of rolling stock without the need for extensive track work or occupying valuable surface area.

The 180T Locomotive Turntable offers the following features:

- \rightarrow Easy to use operator interface
- \rightarrow Fully automated one push operation
- \rightarrow Automatic shot pin locking mechanism upon track alignment
- → Safety railing around the entire perimeter to prevent any open access during rotation
- \rightarrow Full length Lanyard E-stops on both sides of the bridge section
- \rightarrow Interlocked pit access gates

Optional Features:

- \rightarrow Fully enclosed operator cabin
- → Configurable for differing lengths and capacities dependant on end user requirements

Backed by the largest in-country Rail Workshop service and support capability; service and support capability that only an original equipment manufacturer can provide.
